mflake@warrencountymo.org/www.warrencountymo.org

ON-SITE SEWAGE SYSTEM INSTALLATION/MAJOR REPAIR STEPS

STEP 1: SOIL EVALUATION: This must be completed by a soil scientist who meets the requirements of the Missouri Department of Health and Senior Services (MDHSS). This office maintains a listing of soil scientists who meet these requirements and do business in Warren County. If you have an installer selected, it is recommended that you have them meet on site with the soil scientist. The soil scientist will mail one copy of the report to the client and one copy to this office.

STEP 2: SUGGESTED INSTALLATION SHEET: Based on the soil information and a calculated flow rate for the facility this office will complete a suggested installation sheet and mail it to the client listed on the soil evaluation. Only minimum system sizes are provided, it is recommended to increase the size of the system above the minimum.

STEP 3: PERMIT: A County permit must be obtained prior to breaking ground. System design sheets must be submitted before a permit will be issued. If the property owner listed on the deed is unable to obtain the permit; a signed, notarized affidavit must be presented giving someone else permission to obtain the permit on the property. The permit expires 1 year from the date of issuance and is not issued the same day.

When applying bring:

- Completed Request for On-site Sewage Inspection/Permit
- Recorded warranty deed if the property has been purchased less than 6 months ago.
- Address assignment from 911 Business Office, call (636) 456-7088.
- Soil evaluation.
- Photo Identification.

A. Wastewater permit: All persons completing the construction or the making of major modifications or major repair of an on-site sewage treatment system must provide a completed *system design form* to this office prior to the work and prior notice to this office of major work each day the work is to be performed. Owners working on their own systems are included in this requirement; and in addition must meet with the Sanitarian prior to any work on the system. If any person is paid for any portion of installing the system they must be a Warren County registered installer. This office maintains a listing of installers who have been registered by MDHSS and Warren County.

Wastewater permit fee: \$100.00 (exact cash or check, payable after permit approved. Photo ID).

STEP 4: INSPECTIONS: Proper notification each day major work is conducted on a sewage system will allow this office opportunity for inspection during construction. When the sewage system is completed and final inspection conducted zoning will release the permanent electric sticker. Zoning does not allow a home constructed off-site to be placed on a property and/or issue a permanent electric sticker for a new residence until this office has completed a final inspection of the sewage system.
